Global Connections

The School of Energy Hard Knocks

<http://www.theglobalist.com/getarticle.aspx?StoryId=7068>

Study Questions and Project Ideas

1. How should the international community respond to rising global energy demands? What impact might this response have on the world's demand?
2. What forms of alternative energy are common in your community or country? How might these energy resources be implemented around the world?
3. In small groups consider the world's energy needs 50 years ago. How have these needs changed and how are they similar?
4. How does the developing world's energy needs differ from those of the west?
5. How might the needs for energy compare in different regions around the world in the next 50 years? What impact would this have on global supply and demand?
