Murder in Turkey

The murder of journalist Jamal Khashoggi in the Saudi Arabian consulate in Istanbul on Oct. 2, 2018, has sparked an international outcry. The murder of the Saudi dissident, who had been living in Washington, D.C., and was a contributing columnist for The Washington Post, has raised questions about the involvement of Saudi leaders in the killing.

The murder has cast a shadow over relations between the United States and Saudi Arabia, which is the largest oil exporter and a key ally in the fight against terrorism. The murder has also raised concerns about the future of the so-called ‘Great Power’ competition between the United States and China.

The murder has also highlighted the importance of press freedom and the need for governments to protect journalists.

The murder has also raised questions about the role of the United States in the Middle East, particularly in the context of the Iran nuclear deal.

The murder has also raised questions about the role of the United States in the Middle East, particularly in the context of the Iran nuclear deal.
